Professional Summary

Data Science and Full Stack Developer with 2+ years of project-based experience designing and developing data-driven web applications, scalable APIs, and machine learning solutions. **Proficient in Python, SQL, Next.js, FastAPI, Django, Node.js, PyTorch, TensorFlow, and data visualization tools. Experienced in data analysis, predictive modeling, machine learning, deep learning, computer vision, RAG systems, federated learning, and LLM-based applications.** Skilled in building end-to-end solutions, from data collection and model development to deployment, authentication, RBAC, and performance optimization. Passionate about leveraging data science and modern web technologies to deliver impactful, intelligent, and scalable products.

EXPERIENCE

Google

Data Science Intern

India (Hybrid)

April 2026 – June 2026

- Analyzed large-scale datasets using Python, SQL, Pandas, and statistical techniques to identify trends, optimize processes, and support data-driven decision-making and developed and evaluated machine learning models for classification, prediction, and pattern recognition, improving model accuracy and performance through feature engineering and hyperparameter tuning.
- Built interactive dashboards and visualizations to communicate key insights to stakeholders, enabling effective monitoring of business and product metrics and performed exploratory data analysis (EDA), data cleaning, and preprocessing on structured and unstructured datasets to improve data quality and model reliability although Collaborated with cross-functional teams to design experiments, conduct A/B testing, and translate analytical findings into actionable business recommendations.

NexCraft

Software Development Intern

India (Remote)

May 2025 – October 2025

- Developed and optimized responsive web applications using **Next.js**, implementing dynamic routing, server-side rendering (SSR), and reusable React components to enhance user experience and application performance and integrated REST APIs and managed data flow between frontend and backend systems, ensuring efficient data fetching, state management, and seamless user interactions.
- Improved application performance through code optimization, component reusability, lazy loading, and SEO-friendly rendering techniques and collaborated with development teams to debug issues, test features, validate user inputs, and deliver scalable, production-ready web solutions.

PROJECTS

Library Management System | Python

[App-Page](#) | [Live](#) | [GitHub](#)

Developed a Library Management System using Python to automate book cataloging, issue/return tracking, member management, and inventory monitoring. Implemented CRUD operations, search functionality, and data management features to improve efficiency and streamline library operations.

Hospital-Manager | C#, .NET, SQL Server

[GitHub](#)

Developed a desktop application for managing patient records, doctor information, appointments, billing, and medical history. Implemented CRUD operations, authentication, and SQL Server database integration. Designed a user-friendly interface and optimized database operations for efficient hospital management.

Technical Skills

Languages: Python, C++, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, Tailwind CSS, React Flow
Backend: Node.js, Express.js, FastAPI, Django, Flask, REST APIs
Databases & Auth: MongoDB, Firebase, Supabase, Convex DB, JWT, RBAC, Clerk
AI / ML: PyTorch, TensorFlow.js, Scikit-learn, Computer Vision, Federated Learning, Adversarial ML, Transformers
Retrieval & Data: RAG, LLM Reranking, LangGraph, FAISS, BM25, TF-IDF, NumPy, Pandas, OpenCV
Tools: Git, GitHub, Postman, Vercel, Railway, Hugging Face
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Honours & Achievements

LeetCode – Solved **500+ DSA problems**; achieved peak rating of **1500**.
Implemented responsive and **mobile-friendly** user interfaces using modern frontend frameworks.
Developed and deployed scalable **full-stack web applications using modern technologies**, improving application performance and user experience.

Education

Bennett University Greater Noida, India
Bachelor of Technology in Computer Science and Engineering
• **Coursework:** Software Development, Data Science, Artificial Intelligence, Operating Systems, Computer Networks, DBMS, OOP, Data Structures & Algorithms
